Program alignment & performance

Program alignment & performance: key considerations

Objective for this section:

- Provide directional insight into how institutions are improving in how they support their unique student population to graduate ready to enter the workforce
- Provide a starting point for institutions to highlight their own proven successes within their unique context

Considerations:

- Outcomes should be viewed in context of an institution's unique mission, student mix, and local conditions; as such, institutions may have different definitions of success
- Workforce outcomes are influenced by a variety of factors beyond the remit of post-secondary institutions (e.g., local labor market trends, macro-economic environment, individual circumstances, etc.)
- Longitudinal data on post-completion outcomes and workforce alignment may have gaps and limitations
- Institutions have varying programmatic strengths and should be encouraged to build on areas of distinctiveness vs. aiming to be "everything for everybody"

Occupational alignment: key considerations

Objective for this section:

- Provide directional insight into how institutional degree conferrals align to high-growth occupations in the Commonwealth of Virginia

Approach:

- A tailored set of degree programs at 2 & 4-yr levels matching each occupation was chosen based on CIP codes and the most common degree programs across the state (full list in backup)

Considerations:

- Occupational alignment data is still nascent; VOEE's "Education and Workforce Alignment" dashboard is pending public release for institutional use.
- The mapping of programs of study to high-growth occupations may have gaps and limitations, as there is no clear 1:1 mapping between degree programs and occupational requirements.
- Some occupations (e.g., business operations specialists) may not capture all projected workforce supply-demand gaps.

Chart (D): Are students graduating from programs that are aligned to occupations that are expected to see high growth in the next 5 years?

Occupations

Share of students graduating from programs aligned to high-growth occupations

Note: Excludes high growth occupations that typically do not require any college education for entry level positions; excludes "Other Management Occupations" due to lack of consistent "core" associated programs
